**Subject:** Richmond Segment Stations - Alignment Drawings

Jan:

We noticed when looking back at the Richmond alignment drawings, which are contained in the EAC Application Supplement, that a footprint is shown for a Westminster Station. This is incorrect, as Westminster station was combined with Richmond Centre station when the terminus of the line was moved north 250m to just south of Saba Road at No. 3 Road. The text of the Supplement correctly identifies the four Richmond stations (Bridgeport, Cambie Road, Alderbridge and Richmond Centre). Attached is a pdf file with the set of Richmond Segment alignment drawings, with the last drawing corrected to show only the Richmond Centre station.

Our apologies for any confusion this may have caused. The large format alignment drawings used at the open houses are correct.

Scott
