Dear Olivia Stanley:

Thank you for your letter dated November 16, 2026, requesting that the Environmental Assessment Office (EAO) pause the Effects Assessment and Recommendations phase of the Environmental Assessment for the Fraser River Tunnel Project (FRTP). The EAO acknowledges receipt of the request and understands the rationale for allowing the incoming government time to establish its priorities and provide further direction on FRTP.

The EAO has therefore paused the Assessment process until further notice. This includes pausing activities associated with concluding the Environmental Assessment and referring the project for decision. However, I ask that TI Corp maintain sufficient readiness during the pause to support the EAO in resuming the process without unnecessary delays, should the incoming government provide direction to seek an environmental assessment certificate for FRTP.

We appreciate TI Corp's continued collaboration and look forward to re-engaging once further direction is available.

…2

Sincerely,

Breanna Merrigan
Project Assessment Director
